language trilingual danish/english/arabic programming,	since 2018	Co-founder & deep learning consultant Ambition to create leading research in natural language processing in Denmark. Our hope is to bridge the gap between research and product, such that state of the art deep learning technologies are no longer Silicon Valley proprietary assets.
markup, and tools Python, PyTorch, CUDA, C, C++, C#, Java, JavaScript, Ruby, Haskell (learning), SQL, NoSQL, ReQL,	2016–2018	System architect Built scalable and secure back-end to handle thousands of users on mobile apps. Server maintenance, file storage, and DNS hosted by AWS. Data crawling, data handling, and data processing. Applied deep learning techniques to approximate prices of the used car market. The founder has a vision of making it easier and more transparent to sell/buy a used car. First round of investment on \$1.8M with an evaluation of \$6M.
Git, SVN, Docker, Vim, Terminal, LAT _E X, Linux, Windows	2015–2016	Student developer Berlingske People A/S, Radio24syv Website, API infrastructure, and other IT tools used internally. NodeJS with ExpressJs, AngularJS, and C# with Dokku (local hosting) and MongoDB for storage. Hosted with Heroku and custom local servers.
main interests deep learning	2014–2015	Student developer Falck Healthcare A/S Web development with Ruby on Rails using a PostgreSQL database.
computer security software engineering	08–12 2013	Assistant teacher Assistant teacher in imperative programming with C. The University of Aalborg
	02–07 2011	Private (national service) Danish Emergency Management Agency Firefighting education and emergency duty.

publications

Oct 2016 Neural Machine Translation with Characters and Hierarchical Encoding

arxiv.org/abs/1610.06550

In NIPS RNN Symposium 2016.
