| | Customer service, cleaning, cooking and delivery | |

## interests and spare time

I have always been interested in technology. I started studying computer science to learn more about programming, computers and IT in general. Machine learning and issues of computer security have caught my attention, and these are subjects I am focusing on for my Masters degree.

I like to read and watch anything exiting about nature and the universe. I love the tv series "Cosmos: A SpaceTime Odyssey" with Neil deGrasse Tyson, I am reading the book "A Short History of Nearly Everything" by Bill Bryson and will continue with "A Brief History of Time" by Stephen Hawkings afterwards.

# **qua**lifications

I am a quick learner and curios of nature. I can easily familiarize myself with new topics. I have great interest in programming. I have experience with content management systems like WordPress. Version control systems, such as Git and SVN, which I work with daily. Additionally, I have knowledge of operating systems, especially Windows and Ubuntu.

# **oth**er activity

| | | |
|---|---|---|
| 2013–2014 | **Member of the Board of Studies** | The University of Aalborg |

Discussions of applications of qualifications and exemptions, study lines, quality assurance of eudcation and the like.
